MUM HAS CANCER

WRITTEN BY
EILEEN WHEELER
& ILLUSTRATED BY
IRIS MAANOJA

This book is designed to be read initially by children and adults together. It is a book about the impact that the diagnosis of a mother's cancer can have on a young child's life. It is a starting point for discussion, giving the adult a way in to ask about the child's own experience of a difficult situation.

This book is equally relevant for other long term medical illnesses.
